A PITCH FOR Pharmacies

Pharma Bridge

Connecting pharmacies. Saving medicines. Protecting the planet.

A digital marketplace B2B SaaS for surplus Over The Counter (OTC) medicines.

PRESENTED BY

- Health Policy and Financing

The Problem

Cost - The £300M Black Hole

£300 million estimated NHS spend on unused prescription medicines — every single year.

Source: The Department of Health and Social Care (DHSC)

The Overwhelmed NHS - The Shortage Paradox

The government is warned 28 times a week about medicine supply problems in 2020-2025; a total of over 7000 separate warnings were made since October 2020 (Source: National Pharmacy Association)

Safety - No standardised sharing system

Redistribution happens ad-hoc, informally, and without the audit trail regulators require - *"what we do is we may have a local pharmacy call us up and say can we borrow x item. We say okay you can take that but we need y in return."*

Environmental and equity cost

Medicines and their associated supply chains account for approximately 25% of the NHS's entire carbon footprint (Source: NHS England)

Why now?

Four structural forces — financial, environmental, digital, and political — are converging at the same moment.

01

NHS financial pressure

Between 2022/23 to 2023/24, deficits across NHS systems doubled, going from £517 million to £1.4 billion (Source: Department of Health and Social Care)

02

NHS' net zero goal by 2040

An 80% emissions reduction commitment by 2028-2032 puts pharmaceutical waste squarely on the sustainability dashboard (Source: NHS England)

03

Digital maturity

Existing Inventory Managements Software have Many Possible Integrations. Pharmacy Manager, ProScript, RX web, Titan

04

Post-COVID & post-war fragile supply chains

"Geopolitical tensions, the aftermath of the pandemic and disruptions to crucial shipping routes have "exposed the fragility of international supply chains, causing costly delays and supply shortages that reverberated across healthcare systems worldwide" (Source: The Week)

One local supply network

PharmaBridge Highlights

1

Frition-less Integration

Works with exsting Inventory Management Systems

2

Compliance built from the beginning

Work with certified Phamarcists.
Sellers must hold WDA(h).

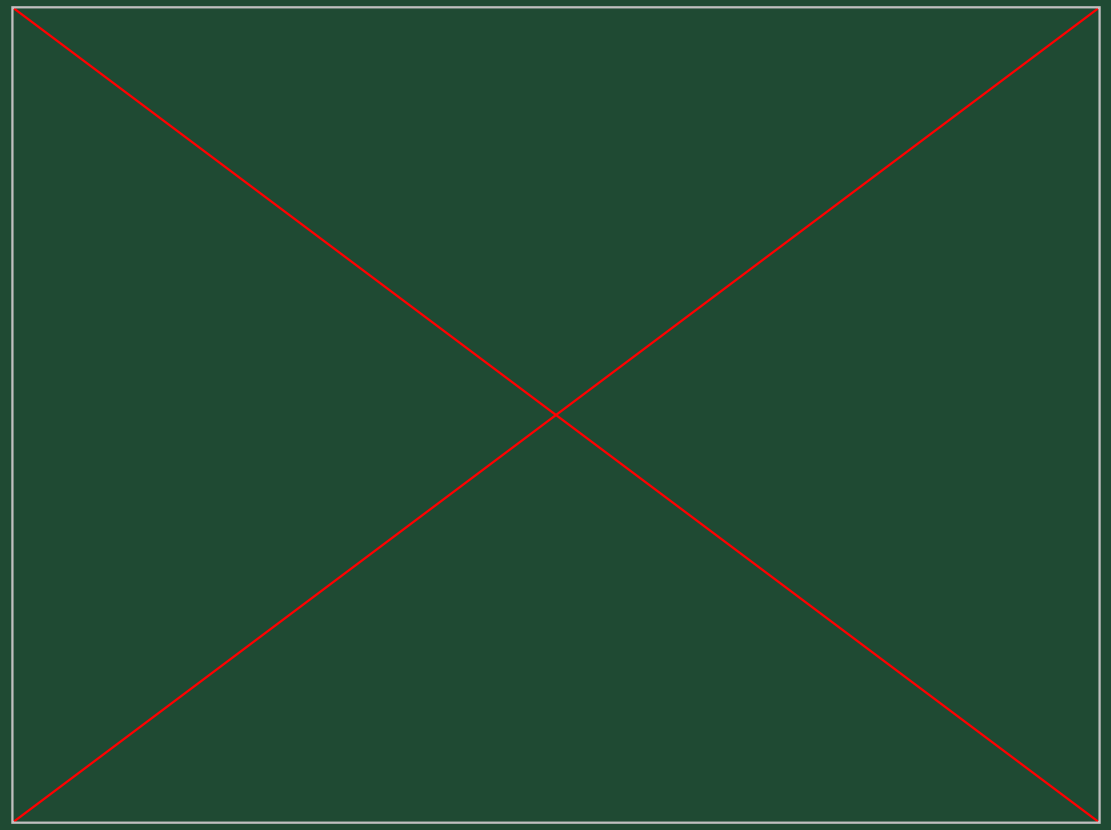
3

Traceable and Auditable

Report generated for every transaction.
Monthly and annual impact report.
.

INTEGRATES WITH: NHS EPS · Pharmacy PMR systems · NHS Spine · MHRA audit requirements

Demo



PRESENTED BY
The PharmaBridge Team
NHS Digital Innovation Hackathon

COMPLIANCE BY DESIGN

Audit-safe by default.

“

The product removes regulatory ambiguity, not create more of it. Every transfer is wrapped in identity checks, pricing controls, and a complete digital paper trail.

Compliance lives in the workflow, not in a training manual

01

Live licence verification

Onboarding checks GPhC and MHRA registers, then revalidates daily so suspended premises are automatically blocked.

02

Cost-recovery guardrails

Transfers are capped to Drug Tariff or verified invoice price, preventing commercial profit on the medicine itself.

03

Immutable transfer records

Every handoff stores batch, GTIN, expiry, timestamps, pharmacy IDs, and courier identity in a five-year audit trail.
